

## Certificate of Analysis

Goat Anti-mouse IgG (H+L),

**Catalog Number: MBS176716**

Lot # MBS17D21C38

we got the following data:

### 1. Product Description

This antibody is purified from antiserum by immunoaffinity chromatography which removes essentially all goat serum proteins, except the specific antibody for mouse IgG. The antibody preparation is solid phase adsorbed with human serum proteins to ensure minimal cross reactivity in tissue or cell preparations.

### 2. Application Data

Immunohistochemistry (IHC);  
Immunofluorescence(IF);  
Immunocytochemistry(ICC);  
Western blot (WB)  
ELISA

### 3. Contents

1 mg of affinity purified specific antibody (purification>99%). 0.01M PBS, 0.01% Thimerosal.
