

Product Name: Mouse Receptor-interacting serine/
threonine- protein kinase 3 ELISA Kit

Specificity: Recombinant and natural Mouse Receptor-interacting
serine/threonine-protein kinase 3

Synonyms: RIP-like protein kinase 3,Receptor-interacting protein 3

Catalog No.: MBS289270 **Sandwich**

Standard Preparation

Reconstitute the Standard with 2.0 mL of Sample Diluent. This reconstitution produces a stock solution of 20 ng/mL. Allow the standard to sit for a minimum of 15 minutes with gentle agitation prior to making serial dilutions (Making serial dilution in the wells directly is not permitted). Please firstly dilute the stock solution to 10 ng/mL and the diluted standard serves as the high standard (10 ng/mL).The Sample Diluent serves as the zero standard (0 ng/mL).

Detection Range: 0.156 ng/mL -10 ng/mL.

Sensitivity: less than 0.087 ng/mL

Performance Characteristics: Intra-Assay CV: ≤6.3%

Inter-Assay CV: ≤8.7%

Spike Average Recovery: 102%

Typical Data

Results of a typical standard curve are provided for demonstration only and should not be used to obtain test results.

A standard curve must be run for each set of samples assayed.

IMPORTANT: After receiving the kit, please check the intactness of outer packaging, check whether the reagent bottles are broken, leaking or the amount of liquid is significantly reduced, etc. If the diluent is polluted such as flocculent bacterial colonies; the substrate is not transparent and the microtiter plate is leaking, etc; please contact the distributor. In rare cases, the crystals may appear in the substrate. Normally the crystals will dissolve at room temperature, this will not affect the testing results.
