## Human anti-alpha 1 adrenergic receptor (ADRA1) antibody (IgG) ELISA Kit

## PRECISION

Intra-assay Precision (Precision within an assay): CV\%<15\%
Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision (Precision between assays):CV\%<15\%
Three samples of known concentration were tested in twenty assays to assess.

TYPICAL DATA

| Test parameter | specification | test result |
| :---: | :---: | :---: |
| Positive control | $>0.6$ | 1.266 |
| Negative control | $<0.1$ | 0.038 |
| Positive rate | 10, Positive | $100 \%$ |
| Negative rate | 10, Negative | $100 \%$ |
