

# Rabbit anti-Human IgG Fc Antibody;HRP conjugated

<b>Product Code</b>	MBS719658
<b>Storage</b>	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
<b>Research Use</b>	Caprylic Acid Ammonium Sulfate Precipitation purified
<b>Immunogen</b>	Human IgG Fc fragment
<b>Raised In</b>	Rabbit
<b>Species Reactivity</b>	Human
<b>Tested Applications</b>	ELISA, WB; Recommended dilution: WB:1:500-1:5000
<b>Relevance</b>	<p>The fragment crystallizable region (Fc region) is the tail region of an antibody that interacts with cell surface receptors called Fc receptors and some proteins of the complement system. This property allows antibodies to activate the immune system. In IgG, IgA and IgD antibody isotypes, the Fc region is composed of two identical protein fragments, derived from the second and third constant domains of the antibody two heavy chains; IgM and IgE Fc regions contain three heavy chain constant domains (CH domains 2–4) in each polypeptide chain. The Fc regions of IgGs bear a highly conserved N-glycosylation site. Glycosylation of the Fc fragment is essential for Fc receptor-mediated activity. The N-glycans attached to this site are predominantly core-fucosylated diantennary structures of the complex type. In addition, small amounts of these N-glycans also bear bisecting GlcNAc and <math>\alpha</math>-2,6 linked sialic acid residues.</p>
<b>Form</b>	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze.
<b>Conjugate</b>	Preservative: 0.03% Proclin 300 Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
<b>Storage Buffer</b>	Liquid
<b>Purification Method</b>	HRP conjugated
<b>Isotype</b>	IgG
<b>Clonality</b>	Polyclonal
<b>Alias</b>	fragment crystallizable region
<b>Product Type</b>	Secondary Antibody
<b>Image</b>	

!FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES!

Western Blot  
Positive WB detected in Recombinant protein  
(80ng, 40ng, 20ng, 10ng)  
All lanes: Human IgG Fc antibody; HRP  
conjugated at 1:1000  
Predicted band size: 35 kDa  
Observed band size: 35 kDa
